

ABSTRACT OF THE DISCLOSURE

An eyeglass assembly includes a primary eyeglass unit and an auxiliary eyeglass unit. The auxiliary eyeglass unit includes two auxiliary lenses, a connecting member that is connected fixedly to the auxiliary lenses, and a magnetic connector that is attached to the primary eyeglass unit by a magnetic attractive force and that is connected pivotally to the connecting member so as to permit an assembly of the connecting member and the auxiliary lenses to turn upwardly relative to the primary eyeglass unit.
